

Albany County

Town of Coeymans: *Town of Coeymans Local Waterfront Revitalization Program* - Building on the recent completion of its Comprehensive Plan, the Town of Coeymans will complete the draft 1995 Local Waterfront Revitalization Program for its Hudson River waterfront. The program will address protection of priority waterfront resources, promotion of the Town's riverfront identity, and identification of water-based economic and recreational opportunities. \$19,250.

Bronx County

City of New York: *South Bronx Greenway - Food Center Drive Improvements* - The New York City Economic Development Corporation, sponsored by the NYC Department of Small Business Services, will design and construct a reconfiguration of the 1.3 mile Food Center Drive on Hunts Point to provide a separated, landscaped bike lane as part of the South Bronx Greenway. This greenway segment will connect with the previously funded Hunts Point Landing street end park, currently in design, that will ultimately provide access to the East River. \$3,005,000.

Broome County

City of Binghamton: *Chenango River Trails Connection Project* - The City of Binghamton will design an extension of the City's existing Chenango River trail to connect the current terminus at Cheri Lindsey Park to the 3.5 mile Otsiningo trail system. This work builds on the ongoing construction of the trail system along the eastern bank of the Chenango River, nearly completed. \$105,000.

Town of Vestal: *Broome County Intermunicipal Waterfront Revitalization Project* - The Town of Vestal, on behalf of 22 communities in Broome County, proposes to develop an intermunicipal waterfront revitalization strategy focused on public access for the Chenango, Delaware, Susquehanna and Tioughnioga Rivers. The project will result in a land and water use plan identifying public access improvements and projects, potential funding and marketing sources, and a possible water trail route. Work will be performed through a combination of contractual services and municipal staff from participating communities. \$48,000.

Chautauqua County

Town of Ellicott: *Chautauqua Lake & Watershed Management Plan Implementation, Phase 1* - On behalf of the Chautauqua Lake Management Commission, the Town of Ellicott will oversee implementation of several recommendations and projects identified in the intermunicipal management plan, including planning and design of sediment removal and erosion control projects; establishment of a full-time lake management project coordinator; and continued conduct of public education and highway department protocol improvement efforts. \$400,000.

Town of Westfield: *Concord Grape Belt Heritage Area Management Plan* - The Town of Westfield, in partnership with the Concord Grape Belt Heritage Association, will prepare a Heritage Area Management Plan for the Lake Erie Concord Grape Belt Heritage Area, designated in 2006. The Heritage Area encompasses those portions of Chautauqua County associated with grape growing and processing, and stewardship and development of the wine and juice industries. The plan will address issues of agricultural preservation, education, recreation and economic revitalization. \$75,000.

Clinton County

Village of Keeseville: *Ausable Horse Nail Company Complex Planning* - The Village of Keeseville, in partnership with Adirondack Architectural Heritage (AARCH), will conduct architectural planning necessary to restore and redevelop the Stone Mill, part of the historic Ausable Horse Nail Company complex located on the Ausable River. Work will include inventory of existing conditions, code and environmental research, concept planning, and development of cost estimates and an implementation plan. \$14,700.

City of Plattsburgh: *Waterfront Rediscovery Program Phase VI* - The City of Plattsburgh will study potential mitigation options for the negative impacts of the wastewater treatment plant situated at the mouth of the Saranac River on Lake Champlain, adjacent to the City's proposed hotel and conference center development site. Work will focus on assessment

and cost estimation for possible odor control and noise attenuation measures, and aesthetic improvements. The City's ongoing facility operations improvements will serve as match, in conjunction with in-kind services and cash. \$110,000.

Village of Rouses Point: *Implementation of Downtown & Waterfront Revitalization Priority Projects* - The Village of Rouses Point will undertake actions intended to advance its Downtown and Waterfront Revitalization Plan. Grant funding will primarily support continuation of a Revitalization Project Manager contract position, to be matched by Village construction of streetscape improvements along Lake Street, and ongoing technical assistance provided by the SUNY Plattsburgh Small Business Development Center to downtown businesses. \$21,000.

Town of Saranac: *Town of Saranac Community Visioning and Revitalization Strategy* - The Town of Saranac will conduct community visioning and planning for the development of a revitalization strategy for the Saranac River waterfront. The project will also plan for potential revitalization opportunities related to the new, 14,000 acre Sable Highland Recreation Area. Finally, the Town will conduct a promotional campaign to highlight local resources, beginning with video development and marketing of an expanded Flatwater Canoe Challenge. \$61,000.

Cortland County

Village of Marathon: *Village of Marathon Waterfront Redevelopment Project* - The Village of Marathon will construct downtown streetscape, connectivity and recreational improvements to complement the planned reconstruction of Route 221/Main Street. The project will include streetscaping along Peck Street to connect with the River Trail, creation of a walkway along Brink Street linking the Village parking lot with Main Street, and installation of a playground at Lovell Field. \$515,000.

Delaware County

Village of Margaretville: *EBDR Planting and Trail Installation Component* - The Village of Margaretville will continue work on a phased waterfront stabilization project on the East Branch Delaware River at Pavilion Park. Work, to be conducted by the Delaware County Soil and Water Conservation District and other contractors, will include buffer soil renovation; invasive species eradication; streambank, floodplain and grassland plantings; and installation of nature trail and trail placards. \$58,989.

Village of Walton: *Third Brook Watershed Management Plan - Village of Walton* - The Village of Walton, in partnership with the Delaware County Soil and Water Conservation District and the Town of Walton, will develop a watershed management plan for Third Brook, a tributary of the West Branch of the Delaware River. This basin was impacted by extreme flooding in June 2006, and this project will complement additional, ongoing efforts to plan for flood mitigation and a Comprehensive Plan update. \$58,081.

Dutchess County

Town of Poughkeepsie: *Longview Park Interpretive Signage* - The Town of Poughkeepsie will design, fabricate and install three low-profile interpretive signs on the historical significance of the Marist College-operated Longview Park site on the Hudson River. Proposed themes include interpretation of the voyage of Henry Hudson's Half Moon, the Intercollegiate Rowing Association's Poughkeepsie Regatta, and the adjacent Rosenlund Estate Stone Buildings Historic District. \$18,200.

City of Poughkeepsie: *Downtown Economic Revitalization Grant* - The City of Poughkeepsie will develop a Downtown Economic Enhancement Strategy that will include analysis of existing resources and retail, office and housing markets; a marketing and business recruitment strategy; and recommendations for Main Street revitalization. The project will be conducted through a combination of contractual services and municipal personnel. \$60,000.

Village of Wappingers Falls: *Village of Wappingers Falls Local Waterfront Revitalization Plan* - The Village of Wappingers Falls will conduct visioning for the development of a Local Waterfront Revitalization Strategy that will complement the Village's Comprehensive Plan, and serve as the basis for a marketing program to promote tourism development. Work will include an analysis of waterfront development opportunities and constraints, historic resources,

and potential public recreational access points, and will result in marketing plan development. \$57,500.

Erie County

City of Buffalo: *Riverwalk Revitalization Phase I* - The Buffalo Niagara Riverkeeper, sponsored by the City of Buffalo, will undertake a series of projects directed at revitalizing the Niagara River Riverwalk. Grant funding will support Riverkeeper staff and supplies necessary to undertake development of a Riverwalk revitalization action plan; preparation of plans, designs, environmental review and funding applications for projects at Bird Island Pier/Broderick Park, LaSalle Park, the former toll plaza site, the Naval Yard site, and Rich Marina; development of a heritage interpretation plan; and employment of Student Conservation Association interns to serve as guides and interpreters throughout the Riverwalk park system. In addition, funding will support consultant services for preparation of a feasibility study for the County-owned Black Rock Canal Park concept. \$323,550.

Town of Grand Island: *Fisherman's Park* - The Town of Grand Island will design and construct the proposed Fisherman's Park, located on a vacant Town-owned parcel on the Niagara River. Work will include the demolition of an abandoned digester; installation of safety features and beautification of the sanitary sewer station; site grading, clean-up and preparation; rehabilitation of the existing retaining wall; construction of two parking areas and a pedestrian walkway; and installation of a fishing pavilion, picnic area, garden, bicycle racks, lighting, railings and landscaping. \$267,593.

Village of Lewiston: *Western New York Environmental Coalition* - The Community Foundation for Greater Buffalo, sponsored by the Village of Lewiston, proposes to create a Western New York Environmental Coalition to develop and implement a coordinated regional agenda for natural resources in the eight-county area of western New York. Grant funding will support a Coalition Coordinator, supplies, equipment and contractual services needed to advance the coalition. \$94,000.

Essex County

Village of Saranac Lake: *Saranac Lake/Harrietstown Joint Comprehensive Planning Project* - The Village of Saranac Lake, in partnership with the Town of Harrietstown, will develop a joint comprehensive plan and land use regulations that integrate the goals and recommendations of recent local planning initiatives, including the Village's Local Waterfront Revitalization Program. Five core issues to be addressed are economics, housing, downtown character, environmental quality, and recreation. \$75,000.

Town of Ticonderoga: *Directional Signs and Gateway Enhancements for Historic Downtown Ticonderoga* - The Town of Ticonderoga will develop signage design guidelines, and install five wayfinding signs at major Town entrances to direct pedestrian and vehicle traffic to the historic downtown. Work will be performed through a combination of municipal, contractual and donated services. \$40,000.

Town of Westport: *Boquet River Watershed Management Plan* - The Boquet River Association, sponsored by the Town of Westport, will prepare a watershed management plan for the 280 square mile watershed of the Boquet River, located within the Adirondack Park Preserve. Grant funding will support the contractual services of the Boquet River Association for community meetings, compilation of data and existing land and water use controls, outreach and education, development of recommendations, and preparation of the final management plan. \$50,000.

Town of Willsboro: *Town of Willsboro Local Waterfront Comprehensive Planning Program* - The Town of Willsboro, in partnership with the Wildlife Conservation Society, will undertake a community planning process to develop an APA-approvable comprehensive plan, land use regulations, and project review guidelines. Grant funding will support contractual services, supplies and equipment necessary to advance planning. \$59,430.50.

Town of Wilmington: *Stormwater Drainage Treatment Systems* - To implement its draft Local Waterfront Revitalization Program, the Town of Wilmington will install two stormwater treatment systems at the entrance bridge to Whiteface Mountain Ski Center to control runoff from parking areas flowing into the West Branch of the Au Sable River. This work will be conducted in conjunction with the Town's proposed water district expansion for the ski center area. \$50,000.

Franklin County

Village of Malone: *Town/Village Local Waterfront Revitalization Program - Phase 2* - The Village of Malone will complete work on its ongoing Local Waterfront Revitalization Program for the Salmon River waterfront. The project will include development of waterfront revitalization policies and local implementation techniques, as well as SEQRA documentation, program review, and adoption. \$20,000.

Hamilton County

Town of Inlet: *Arrowhead Park Waterfront Revitalization* - The Town of Inlet proposes to renovate and upgrade Cottage #4, located on Fourth Lake along the Fulton Chain of Lakes in Arrowhead Park, to serve as an historical museum to display and store the Town Historian's collection of documents and artifacts. This project is the first phase in a multi-phase park revitalization effort. Grant funding will support architectural and engineering services, interior demolition, reconstruction, and installation of HVAC and utilities in the renovated cottage. \$106,000.

Jefferson County

Town of Clayton: *Professional Land Planner for the Frink Redevelopment Project* - The Town of Clayton, in partnership with the Clayton Local Development Corporation, will contract with a professional land planner to advance the proposed mixed-use redevelopment of the 8-acre Frink property, located on the St. Lawrence River in the Clayton Riverwalk District. Work will include identification of appropriate uses; development of concept alternatives, a site master plan, design standards, and marketing materials; and solicitation and selection of a site development team. This redevelopment will advance the Town's Local Waterfront Revitalization Program and complement the previously funded "Riverwalk" pedestrian walkway. \$35,000.

City of Watertown: *Phase III Black River Rediscovery Project* - The City of Watertown will advance a priority project identified in its draft Local Waterfront Revitalization Program for the Black River waterfront. Work will consist of design and reconstruction of the "JB Wise" parking lot, including reconfiguration of parking spaces, improved entranceways, new sidewalks, landscaping, and lighting, in order to better connect downtown with the Black River waterfront. \$505,000.

Kings County

Borough of Brooklyn: *Implementation of Brooklyn Waterfront Greenway CB 1, 2 & 6 - Phase 3* - The Office of the Brooklyn Borough President will hire the Regional Plan Association and Brooklyn Greenway Initiative (BGI) to continue coordinating implementation of the Brooklyn Waterfront Greenway in Brooklyn Community Boards 1, 2 and 6. Work will include oversight of the development of construction plans and specifications for key greenway segments; coordination with public agencies and private property owners along the greenway route; formalization of BGI as the permanent stewardship entity for the greenway; and updating and publication of a complete greenway plan. \$333,062.

City of New York: *Newtown Creek Public Education Initiative* - The New York City Department of Education, in partnership with the Brooklyn Center for the Urban Environment, will expand its Newtown Creek Public Education Initiative to work with four classes of 11th grade students at the Academy of Urban Planning on a Newtown Creek focused curriculum. In addition, grant funding will support a public symposium on the creek, and free walking and boat tours as part of the Center's annual programming. \$50,000.

Monroe County

Town of Irondequoit: *Irondequoit Waterfront Development Plan* - The Town of Irondequoit will conduct waterfront development planning for specific sites on its Lake Ontario, Genesee River and Irondequoit Bay waterfronts. Work will include market analysis for eight economic opportunity sites; recommendations for zoning, design, regulatory changes, economic incentives, and transportation access and mobility; examination of public access opportunities; and assessment of Town organizational capacity. The waterfront development plan will subsequently be incorporated into an updated Town Master Plan. \$40,000.

Village of Pittsford: *Greenway Waterfront Improvements Project* - The Village of Pittsford will undertake a series of Erie Canal towpath improvements intended to advance the goals of the Joint Town and Village of Pittsford Local Waterfront Revitalization Program. The project will include installation of curbed sidewalks, crosswalks, drainage improvements, street lighting, landscaping, water supply infrastructure, brochure racks and bicycle racks; parking lot entrance reconfiguration; enlargement of the existing dock and installation of a covered pavilion and seating; and paving of Schoen Place. \$315,900.

City of Rochester: *City of Rochester Local Waterfront Revitalization Program Update* - The City of Rochester will update its 1990 Local Waterfront Revitalization Program by extending the boundary to include the Lake Ontario shoreline and all of the Genesee River and Erie Canal within municipal boundaries. The update will also address the City's waterfront development policies, land uses, priority projects, and proposed implementation actions. This work will expand an ongoing LWRP amendment process related to the Port of Rochester and the recently completed Port Master Plan. \$55,000.

City of Rochester: *Erie-Lackawanna Rails to Trails Pedestrian Bridge* - The City of Rochester will complete design and engineering work for a 1600 linear foot multi-use trail to and across the abandoned, City-owned Erie-Lackawanna Railroad Bridge over the Genesee River, connecting with the Genesee Riverway Trail and the Plymouth-Exchange neighborhood Brownfield Opportunity Area. The project concept includes removal of old timber bridge elements, bridge repainting, construction of new concrete walkways and an ADA compliant ramp, and infrastructure and amenities such as railing, lighting, benches, signage, bike racks, and landscaping. \$600,000.

City of Rochester: *River Street Trail, Green Street, and Overlook Project* - The City of Rochester will complete designs for a 1200 linear foot multi-use trail as part of the Genesee Riverway Trail system. This trail segment will extend from the existing terminus at River Street near Latta Road along a planned River Street extension to Portside Drive, and also includes a 500 linear foot trail spur and Genesee River overlook that will provide passive recreational and fishing access. The City will emphasize "green" design elements, including vegetated swales, native planting, porous pavement and bio-retention treatments. \$250,000.

Village of Spencerport: *Southside Waterfront Dock Construction & East Avenue Extension Preliminary Engineering* - The Village of Spencerport will implement its Southside Redevelopment Concept Plan by undertaking engineering and installation of 300 linear feet of Erie Canal dockage and associated service connections, and by designing and constructing an extension of East Avenue from Union Street to Lyell Avenue. These projects capitalize on the Village's waterfront resource, improving access from the central business district and increasing use opportunities for recreational boaters. \$242,500.

Montgomery County

Town of Fonda: *NYS Canal Corporation Maintenance Facility Improvements Phase I* - The Village of Fonda, on behalf of the Mid-Montgomery County Partnership, will prepare design, engineering, and construction documents for a new waterfront park and launch site on the Mohawk River at New York State Canal Corporation Maintenance Facility #3. Design work will include a new access road along Park Street, parking areas, a boat launch, entertainment pavilion, assorted park amenities, and landscaping. The project will also include relocation of a facility security fence to create immediate accessibility, and installation of fence landscaping and screening. \$70,500.

Village of Fort Plain: *Old Military Road Trail* - Building on the Western Montgomery County Local Waterfront Revitalization Program, the Village of Fort Plain will develop design, engineering and construction documents for the proposed Old Military Road Trail loop that will connect with the Erie Canalway Trail. The project will include improvements to and extension of existing trails, the Old Military Road, and the Village road system; development of sidewalks and bike lanes; pedestrian and bike access amenities at key trail nodes; recommendations for wayfinding; and improvements to an historic bridge crossing. \$27,500.

Village of Fultonville: *Mohawk River Scenic Overlook & Waterfront Access Facility* - The Village of Fultonville will design and construct a public waterfront park on the Mohawk River spanning two adjacent Village-owned parcels

totaling 0.3 acres. The proposed park concept includes an 800 square foot scenic overlook, two shade pavilions, a parking area, pathways, bank stabilization, a floating dock system, an information kiosk, signage, landscaping and park amenities. \$135,000.

Multi: Warren, Essex County

Town of Chester: *Schroon Lake Watershed Management Plan* - The Town of Chester, in partnership with the Towns of Horicon and Schroon, the Schroon Lake Association, and the Warren and Essex County Soil and Water Conservation Districts, will prepare a watershed management plan for 4,126 acre Schroon Lake. Work will include watershed mapping; resident surveys; analysis of the stream corridor, stormwater runoff, invasive species, onsite wastewater treatment systems, and road sand and salt usage; data compilation and baseline monitoring of key parameters; review of regulatory framework; and plan preparation. \$57,600.

Multi: Chemung, Ontario, Schuyler, Seneca, Yates County

City of Geneva: *Seneca Lake Watershed Management Plan* - The City of Geneva, on behalf of the Genesee/Finger Lakes Regional Planning Council (GFLRPC), is sponsoring the preparation of a Seneca Lake Watershed Management Plan. Grant funding will support phase one of the necessary watershed characterization, as well as public outreach and educational activities associated with preparation of the watershed characterization and plan. These activities are intended to build on the existing "Seneca Lake Watershed Study" and "State of the Seneca Lake Watershed" management plans. \$152,500.

Multi: Erie, Niagara, Wyoming, Orleans County

Town of Tonawanda: *Healthy Niagara-Strategic Watershed Management Planning and Implementation* - The Town of Tonawanda, in partnership with Erie County and the Buffalo Niagara Riverkeeper, will develop a Niagara River Watershed Atlas, Report Card, and Strategic Management Plan. The project will also include land use planning for the Town of Tonawanda's waterfront. Grant funding will support the contractual services necessary to advance these planning initiatives. \$469,000.

Multi: Essex, Clinton County

Town of Jay: *Watershed Management Planning for the Au Sable - Phase III* - The Town of Jay, in partnership with the Au Sable River Association, will continue watershed management planning for the Au Sable River, building on previously funded watershed characterization work. Grant funding will support Phase II of the planning process, including identification of principal pollutants and water quality impairments, evaluation of gaps in water quality protection, implementation of a community outreach and education program, and preparation of a preliminary subwatershed prioritization. \$51,600.

Multi: Jefferson, Lewis, Oneida County

Town of Martinsburg: *Black River Blueway Trail Project* - The Town of Martinsburg, in cooperation with the Black River Blueway Steering Committee, will implement several components of the intermunicipal Black River Blueway Trail Plan. Work will include removal of navigation hazards in the 40-mile flatwater section of the river between Lyons Falls and Carthage; preparation of a marketing tool kit for the river, including website enhancements; and concept planning and design of two river access sites in the Town of Forestport. \$55,000.

Multi: Livingston, Genesee, Monroe, Orleans, Ontario County

Town of Williamson: *Genesee-Finger Lakes Regional Historic Waterfront Planning Program* - The Town of Williamson, in partnership with the Genesee/Finger Lakes Regional Planning Council, will develop a local law, best management practices, and conduct general planning for the Town and three additional municipalities to be identified during the project. Work will focus primarily on cultural and historic resource survey and documentation. \$30,000.

Multi: Queens, Kings County

City of New York: *Jamaica Bay Watershed Ecological Atlas* - Building on the completed Jamaica Bay Watershed Protection Plan, the New York City Department of Environmental Protection will develop a Jamaica Bay Watershed Ecological Atlas. Work will include inventory and verification of all Jamaica Bay watershed habitat locations, GIS mapping and data compilation for use in restoration project identification and tracking, and prioritization of identified habitat restoration projects for all woodland, shrubland, grassland, dune and beach habitats in the watershed. \$250,000.

Multi: Warren, Washington, Essex County

Town of Queensbury: *Lake George Plan for the Future - Management Plan Implementation* - The Lake George Watershed Conference, sponsored by the Town of Queensbury, will undertake work to advance implementation of the West Brook Stormwater Management Project through site acquisitions and BMP construction. \$1,200,000.

Nassau County

Village of East Rockaway: *East Rockaway Waterfront Revitalization - Phase IV Mill River Access* - The Village of East Rockaway will design and construct a canoe/kayak launch, three fishing stations, and a pathway system with pedestrian amenities on Village-owned property on the Mill River. \$234,500.

City of Glen Cove: *Downtown Gateway to Glen Cove Creek Phase II* - The City of Glen Cove will undertake planning and studies necessary to advance Phase Two of their project to create gateways to the Glen Cove Creek waterfront from the downtown and arterial roads. Work will consist of a comprehensive building inventory, identification of ownership disposition of land, development of a marketing approach, and preparation of an implementation plan. These elements build on the previously funded Phase One of the project. \$90,500.

Town of North Hempstead: *Hempstead Harbor Coastal Interpretive Signage Program III* - The Town of North Hempstead, on behalf of the Hempstead Harbor Protection Committee, will design, fabricate and install a series of four wayside NYSCRIP interpretive signs at strategic public locations along Hempstead Harbor. This work will build on previously funded projects that identified potential signage locations and interpretive themes. \$14,000.

Town of Oyster Bay: *Implementation of South Shore Bikeway Enhancement Study* - The Town of Oyster Bay, in cooperation with the Town of Hempstead and Nassau County, will design and construct the proposed "southern corridor" concept to implement connections between the Bethpage and Jones Beach Bikeways in the South Shore Estuary Reserve. The concept includes trail extension and widening, traffic signal improvements, and installation of signage at a variety of identified locations. The project will also include development of a brochure and route map. \$201,673.

Village of Port Washington North: *Bay Walk Park Phase II Construction and Phase III Planning* - Building on previously funded work, the Village of Port Washington North will advance Phase II of its Bay Walk Park, located on Manhasset Bay. The project will include completion of design and construction of Phase II parcels, including shoreline infrastructure and access amenities. \$505,000.

New York County

City of New York: *East River Waterfront: Intertidal Habitat Restoration Pilot Project* - The New York City Economic Development Corporation, sponsored by the Department of Small Business Services, will design and construct a pilot intertidal habitat creation as part of the ongoing East River Waterfront Esplanade and Piers Project. This habitat project will include creation of East River bottom oyster habitat using reef balls; blue mussel habitat on the Pier 35 pilings using bouchot tubes; and a 70 foot by 30 foot "oyster reef slab" in the Pier 35 structure that will include boulder substrate and intertidal vegetation plantings. \$900,000.

City of New York: *Randall's Island Park - Bronx Shore Pathway* - The New York City Economic Development Corporation, in partnership with the Randall's Island Sports Foundation, will construct 10,072 linear feet of multi-use trail linking the Triborough Bridge Manhattan and Bronx ramp touchdowns in the northwestern quadrant of Randall's

Island Park. The project will include construction of the trail, picnic areas, and recreational fields; reconfiguration of vehicular access and parking areas; and installation of lighting, signage, and other amenities. \$3,183,090.

City of New York: *Mannahatta 1609 GIS* - Under the sponsorship of the New York City Parks Department, the Wildlife Conservation Society (WCS) will advance its "Mannahatta 1609" GIS project to document plant and animal species formerly occurring on Manhattan Island. Building on compiled GIS datasets for topography, shoreline, and ecosystem distribution in 1609, this project will identify pre-European species lists, research and map species distribution, and publish and distribute the completed datasets. The WCS also intends to develop a multimedia exhibit focused on the Mannahatta project in celebration of the 2009 Quadricentennial. \$75,000.

City of New York: *Sherman Creek Waterfront Master Plan* - The New York City Economic Development Corporation, sponsored by the NYC Department of Small Business Services, will develop a master plan for revitalization of the Harlem River waterfront between Sherman Creek and West 208th Street, and the adjacent neighborhood. This project builds on the 2003 Comprehensive Planning Study, and will result in a refined vision, an implementation strategy, and a conceptual design that articulates improved land use, pedestrian and vehicular circulation, visual quality, and linkages with area amenities and open spaces. \$300,000.

City of New York: *Tidal Wetlands GIS Mapping* - Through its Office of Long-Term Planning and Sustainability, the City of New York will develop a fine-scale GIS layer of its tidal wetlands. This work is intended to support improvements in wetlands and underwater lands protection and management, and in regulatory, funding and other decision making about waterfront development projects. Work will be conducted primarily by Columbia University's Lamont-Doherty Earth Observatory, in partnership with the Departments of Environmental Protection, Planning, Information Technology and Telecommunications, and the Wetlands Task Force. \$79,800.

Niagara County

City of Lockport: *Lockport Harbor and Marine Center Feasibility Study* - The City of Lockport will conduct a feasibility study for construction of the Lockport Harbor and Marine Center, a transient marina and mixed-use facility to be located west of the Lockport Locks along the Erie Canal in the City's downtown. The study will examine conditions at two publicly-owned sites, including environmental and archeological issues and potential contamination; program and development options for each site will be assessed and uses recommended; and a conceptual plan and rendering of the preferred location will be developed. \$57,500.

Town of Newfane: *Town Marina at Olcott Improvements* - The Town of Newfane will implement its Local Waterfront Revitalization Program by constructing improvements to the Olcott Harbor Overlook on the eastern shore of Eighteen Mile Creek. Work will include construction of a new platform, railings, stairs, site work, and signage, and installation of a pressure washing station at the Town Marina, located on the western shore of the Harbor, to serve the boating and sportfishing public. \$34,125.

City of Niagara Falls: *LaSalle Blueway Trail* - The City of Niagara Falls will undertake a series of activities related to developing a canoe/kayak launch, and conducting urban forestry for parks on Cayuga Island, as part of development of a LaSalle Canoe Trail for the Little Niagara and Niagara Rivers. Using contractual services from LaSalle PRIDE, Buffalo Niagara Riverkeeper, Environment Hamilton, Ecology and Environment, Inc., and others, the City will conduct door-to-door community outreach; environmental analyses, site design and launch construction; tree surveys, removals, and plantings; and a variety of community events to promote the river corridor. \$92,500.

City of Niagara Falls: *Jayne Park Restoration Project* - The City of Niagara Falls will implement its Local Waterfront Revitalization Program and the completed Jayne Park Master Plan by improving amenities at Jayne Park, located on the Little Niagara River. Work will include landscaping, pathway improvements, and installation of park furnishings, two parking lots, and a canoe launch. This site, once completed, will serve as an access point on the planned canoe trail along the Little Niagara and Niagara Rivers. \$145,000.

City of North Tonawanda: *North Tonawanda Local Waterfront Revitalization Program* - The City of North Tonawanda will update the 1988 Local Waterfront Revitalization Program for its nine miles of Niagara River and Erie Canal

waterfronts. This update will allow the City to accurately reflect its current demographics, land use, community vision, and list of priority projects and actions, and will be integrated with an ongoing update of the City's Comprehensive Plan. \$47,750.

Town of Wheatfield: *Wheatfield Local Waterfront Revitalization Program* - As part of a strategy to address rapid growth, the Town of Wheatfield will develop a Local Waterfront Revitalization Program for its Niagara River waterfront. This work will complement ongoing development of a Niagara River Greenway. The LWRP will provide the Town with a planning tool to manage waterfront residential development and erosion, as well as to foster regional linkages and public and private investment in the community. \$23,027.

Onondaga County

Town of Cicero: *Brewerton Revitalization Phase II* - The Town of Cicero will construct a building in the hamlet of Brewerton's Riverfront Park, located on the Oneida River, to house public restrooms and security, and install picnic facilities and electrical hookups along the dock wall. Work will include building design, extension of utilities, building construction, and installation of picnic and other amenities. \$137,500.

City of Syracuse: *Waterfront Linkages: Lake to Creek to Community* - The City of Syracuse will undertake planning, design and construction activities that will advance efforts to enhance linkages between Onondaga Lake, Onondaga Creek, and local neighborhoods, and improve the environmental quality of the planned Onondaga Creekwalk. Work will include identification of six candidate project sites, feasibility analysis and site design for three sites, and construction of one project based on the prepared designs. \$500,000.

Ontario County

Town of Canadice: *Honeoye Lake Restoration Implementation Project* - The Town of Canadice, in partnership with the Honeoye Lake Watershed Task Force, Ontario County Soil and Water Conservation District, and Ontario County Planning Department, will implement recommendations of the Honeoye Lake Watershed Management Plan. The project will survey and prioritize streambank erosion sites, develop recommended Best Management Practices (BMP) and BMP designs; and review municipal land use regulations related to erosion control, determine needed updates for Task Force municipalities, and prepare the necessary revised local laws. \$50,000.

Orange County

City of Newburgh: *Newburgh Water Quality Improvements* - The City of Newburgh will conduct planning and engineering needed for the modification and relocation of the existing combined storm and sanitary main, intended to reduce pollution and enable redevelopment of a 30-acre urban renewal site on the Hudson River waterfront. Work will include a Hudson River Impact Assessment that results in a computer model of existing flows, volumes, and impact mitigation alternatives; and preparation of a Sewer Interceptor Planning Study that investigates site and subsurface conditions, reviews and compares modeling results, and recommends an alternative to develop into a base design report. \$500,000.

Oswego County

City of Oswego: *Captain's Quarters Conference Center Pedestrian and Parking Enhancements* - The City of Oswego will construct a public parking lot and pedestrian corridor on East First Street adjacent to an existing hotel and the site of the proposed Best Western Captain's Quarters Conference Center. The developer of these facilities will donate the land for the parking lot and pedestrian corridor as part of this project. \$214,956.

Rensselaer County

City of Rensselaer: *Design for Rensselaer Waterfront Public Access Improvements* - The City of Rensselaer will develop design, engineering and construction documents for an 11,000 liner foot public access trail along the Hudson River between Dunn Memorial Bridge and Livingston Avenue Rail Bridge, and a bulkhead, pier and wharf at the site of

the planned Marx Properties mixed-use development. These amenities will be linked to the existing street network and the train station, and provide connectivity with the Capital District trails network. \$642,500.

Richmond County

City of New York: *Fresh Kills Park Project: Implementation and Stewardship Strategy* - The New York City Department of Parks and Recreation (DPR) will continue early action programming, and develop and conduct an education and outreach program for the ongoing Fresh Kills Landfill redevelopment project. Grant funding will be used to hire additional DPR staff and to support bus tours of the site, printing and mailing of outreach materials, development of portable informational displays, and other education and outreach supplies. \$200,000.

Rockland County

Village of Piermont: *Piermont Pier Improvements to Celebrate the Quadricentennial* - In order to provide improved facilities as part of the Hudson-Fulton-Champlain Quadricentennial, the Village of Piermont will construct improvements at Piermont Pier on the Hudson River. The Village will repave Ferry Road, transform an abandoned storage building into a welcome center with a new roof, siding, exterior decking, seating, and landscaping, and install two ADA-compliant portable toilets. \$95,000.

Saratoga County

Town of Halfmoon: *Hudson River Waterfront Park* - The Town of Halfmoon will complete design for a new park on a 2.5-acre, Town-owned parcel with 270 linear feet of Hudson River waterfront. The proposed park concept includes passive recreational space with picnic tables, grills, and restrooms; a pavilion for gatherings; an ADA-accessible car-top boat launch and small watercraft docking facilities; and a parking area. Grant funding will cover design and engineering and the preparation of bid documents. \$55,000.

Town of Saratoga: *Old Saratoga on the Hudson Waterfront Revitalization Plan Implementation* - The Town of Saratoga will advance three components of the intermunicipal "Old Saratoga on the Hudson" revitalization plan for the Hudson River/Champlain Canal waterfront. Work will include development of a downtown revitalization program for the Village of Schuylerville, design of 4,675 linear feet of multi-use trail along the Hudson River/Champlain Canal to connect waterfront access points and other trail systems, and construction of a segment of the proposed Riverwalk on Canal Lock C5 Island. \$272,037.

Seneca County

Town of Waterloo: *Cayuga-Seneca Trail Construction* - The Town of Waterloo, in partnership with Seneca County, the Town of Fayette, and the Cayuga-Seneca Canal Trail Association, will complete design for Sections 1 and 2 of the Cayuga-Seneca Trail, linking Seneca Lake State Park to the Village of Waterloo. The 5,000 linear foot Section 1 extends from the State Park to Marshall Road, crossing the 4-lane State Route 96A and the Seneca-Cayuga Canal. The 18,000 linear foot Section 2 will connect Marshall Road with the Village of Waterloo along the former Lehigh Valley rail line on the south side of the Seneca-Cayuga Canal. \$50,000.

St. Lawrence County

Town of Clifton: *Oswegatchie River & Cranberry Lake Access Points & Interpretive Information* - The Town of Clifton, in partnership with the Town of Fine, will implement its intermunicipal waterfront revitalization vision by advancing priority projects. Work will include design and construction of traffic and parking improvements at the community center; development of design and construction drawings for improvements to the Oswegatchie River/Tooley Pond Road boat launch and several Little River access points; and development and installation of signage and markers, and design, publication and distribution of print and online marketing materials for the 50-mile Cranberry Lake trail. The Town also proposes to develop and install two interpretive signs under this grant. \$164,469.

City of Ogdensburg: *Ogdensburg LWRP Revision* - The City of Ogdensburg will update its Local Waterfront Revitalization Program for the St. Lawrence River waterfront, originally approved in 1987. Work will include development of a Harbor Management Plan, integration of the City's Waterfront Redevelopment Plan into the LWRP, and inventory and assessment of waterfront brownfield sites proposed for redevelopment. \$35,000.

Village of Potsdam: *Raquette River Corridor Strategies* - The Village of Potsdam will conduct visioning and planning to develop a Local Waterfront Revitalization Program for its Raquette River waterfront, and will also undertake a Central Business District Development Study and construct improvements to the existing Log Driver's Trail between Potsdam and Norwood. The Village will also design and publish a trail/paddling guide and map. \$80,699.60.

Steuben County

City of Corning: *Southeast Steuben River Council and Vision Project* - The City of Corning, in partnership with the Town of Corning and the Villages of Painted Post and Riverside, will conduct visioning for Chemung River revitalization for the Southeast Steuben County area, to expand on ongoing activities of the Chemung River Council in neighboring Chemung County. The project will result in a "River Vision" report that builds on the previously funded work. \$26,430.

Suffolk County

Town of Brookhaven: *Tuthills Creek Watershed Management Plan* - The Town of Brookhaven, in partnership with the Village of Patchogue, will develop a watershed management plan for Tuthill's Creek, which discharges into Patchogue Bay in the South Shore Estuary Reserve. Work will include watershed characterization, including development of a stormwater infrastructure database, and development of recommendations for preventative and corrective measures. Project work will be performed through a combination of contractual services and municipal staff. \$75,000.

Village of Patchogue: *Patchogue NYSCRIP 2007 Project* - The Village of Patchogue, in cooperation with Fire Island National Seashore and the Town of Brookhaven, will design, construct and install 12 wayside signs within the Patchogue River Maritime Center, a South Shore Estuary Reserve Bayway Destination. The project will include identification of interpretive themes, development of artwork, signage design, fabrication, placement, and site beautification. \$75,175.

Town of Southold: *Hashamomuck Pond Watershed Management Plan Implementation* - The Town of Southold will implement the Hashamomuck Pond Watershed Management Plan by undertaking identified high priority Best Management Practices (BMPs). The project will include installation of grass channels, bioretention systems, dry swales, sediment forebays, oil separators, low flow outlets and site restoration at identified BMP sites. Work will be conducted by a combination of municipal staff and contractual services. \$341,000.

Town of Southold: *The Bittner Preserve Improvement Project* - The Town of Southold, in partnership with Suffolk County, will acquire and construct improvements on the 58-acre Bittner Preserve parcel, located on Long Island Sound between Goldsmith Inlet and Peconic Dunes County Park. The project will provide new public access to 1,400 linear feet of waterfront, and protect mature woodland, secondary dune, shrubland, and freshwater pond and wetland habitats. Work will include removal of existing structures, contamination mitigation, dune vegetation plantings, and construction of a parking area and nature trail. \$195,000.

Town of Southold: *Town of Southold LWRP Hamlet Study* - The Town of Southold requests funding to support completed and ongoing planning for a Comprehensive Hamlet Revitalization Program for the Town's nine hamlets. To date, hamlet stakeholder groups have been formed, presented hamlet stakeholder reports to the Town, and identified priority projects. Grant funding will also support completion of the program, and implementation of several short-term priority projects. These include planning for traffic calming, gateway signage, and affordable housing; lighting and pedestrian movement analyses; development and implementation of site-plan design standards; and an hamlet centers economic study. \$335,250.

Town of Southold: *Stormwater Management in the Town of Southold Phase II* - The Town of Southold will complete Phase 2 of GIS database development geared toward improving stormwater management in creeks. Work, which will be conducted through a contract with Cornell Cooperative Extension of Suffolk County, will include digital inventory of

stormwater structures for all areas not previously covered; training for municipal staff in database use; and stormwater mitigation project implementation based on full database roll-out. \$80,000.

Tompkins County

City of Ithaca: *Cayuga Waterfront Trail Phase 3 Construction* - The City of Ithaca will renovate the trail bridge over Cascadilla Creek and construct a 1,115 linear foot section of Phase 3 of its Cayuga Waterfront Trail, in the city-owned right-of-way along Willow Avenue. This trail segment will include vegetated swales intended to collect and filter stormwater and provide green space. In addition, the intersection of Willow Avenue and Pier Road will be reconfigured to slow traffic and increase pedestrian safety. \$88,340.

Ulster County

City of Kingston: *Kingston Waterfront Engineering and Design Projects* - The City of Kingston will undertake a series of waterfront revitalization planning, design and reconstruction projects for its Hudson River and Rondout Creek waterfronts. Elements will include harbor management planning; developing recommendations to mitigate flooding, manage stormwater runoff, and control erosion at critical locations; evaluating potential extension of water and sewer services to the Rondout II Lighthouse; designing a multi-level parking structure and East Strand streetscape improvements; reconstructing the East Strand trolley track and sidewalks; and purchasing and installing machinery and equipment to improve the sewer treatment plant. \$500,000.

Warren County

Town of Bolton: *Rogers Park Master Plan and Town Pier Improvements* - The Town of Bolton will prepare a master plan for the 4-acre Rogers Memorial Park, located on Lake George, that will integrate stormwater management and aesthetic and recreational improvements such as a new playground area, restoration of basketball courts, ADA accessibility of beach areas, an events amphitheater, and new walkways, lighting, interpretive elements, and landscaping. In addition, the Town will prepare design and construction documents for Town pier improvements that will allow larger vessels to dock safely. \$27,850.

Town of Hague: *Town Dock and Downtown Parking Improvements* - The Town of Hague will implement recommendations of its Downtown Enhancement Plan by designing and constructing improvements for two downtown parking areas located along Hague Brook, and amenities such as lighting, benches, landscaping and signage to enhance the Town dock on Lake George. These projects are intended to increase the aesthetic appeal and functionality of key community gateways. \$128,725.

Town of Johnsbury: *First Wilderness - Making the Connections* - The Town of Johnsbury will advance several projects of the First Wilderness Heritage Corridor Plan. Grant funding will support planning, design and construction of improvements to the North Creek Train Station complex; planning for extension of the First Wilderness Corridor to Tahawus; planning, design and construction of connections between Hadley and Lake Luzerne, including streetscaping and construction of a train station and parking facilities; and hiring new corridor coordination staff for the Warren County Planning Department to assist with marketing and outreach. \$505,000.

Town of Lake Luzerne: *Downtown Revitalization and Riverside Trail Project* - Building on its draft Comprehensive Plan and Waterfront Revitalization Strategy, the Town of Lake Luzerne will advance several identified implementation projects. Work will include completion of design and construction documents for a Hudson River trail connecting the Town Hall park with the bridge to Hadley; feasibility study to examine financial and physical aspects of alternative wastewater treatments; and preparation of hamlet design guidelines. \$26,100.

Town of Warrensburg: *Warrensburg LWRP, Comprehensive Plan and Zoning Update* - The Town of Warrensburg, in partnership with the Warren County Planning and Community Development Department, will undertake preparation of a Local Waterfront Revitalization Program, a Comprehensive Plan, and a zoning update, to address economic development, residential growth and housing needs, recreation, infrastructure, transportation, environmental resources, community services, aesthetics, and the reuse of brownfield sites. The project will result in the preparation of two separate plans,

and adoption of zoning amendments. \$60,000.

Washington County

Town of Fort Ann: *Village of Fort Ann Streetscape Master Plan* - The Town of Fort Ann, in partnership with the Village of Fort Ann, will engineer and construct streetscape improvements for 300 linear feet along Anne Street (Route 4) and George Street (Route 149) near their intersection in the Village center. Improvements will include installation of signage, landscaping, and lighting, and updated sidewalks, crosswalks, and parking improvements. This work will advance the goals of the growth management strategy in the Town's draft Local Waterfront Revitalization Program for its Erie Canal waterfront. \$125,000.

Wayne County

Village of Newark: *The Village of Newark Local Waterfront Revitalization Program* - The Village of Newark will develop a Local Waterfront Revitalization Program for its Erie Canal waterfront, based on work conducted to complete the Village's Downtown Vision Plan. The program will address issues including abandoned and underutilized canalfront properties, limited canal access, and economic revitalization of the Village business district. \$50,000.

Westchester County

Village of Ossining: *Westchester RiverWalk at Crawbuckie Nature Area* - The Village of Ossining will design and construct a 3,700 linear foot trail at Crawbuckie Nature Area as part of the Westchester County RiverWalk along the Hudson River. The proposed trail will link with RiverWalk trails at Mariandale in the north, and with the Village's waterfront in the south. The project will include design, trail construction, installation of benches, signage and kiosks, and construction of a pedestrian bridge over a river tributary. - \$175,000.

Town of Pelham: *The Boathouse at Glen Island* - The Town of Pelham, in partnership with the Pelham Community Rowing Association (PCRA), will construct a 4,000 square foot boathouse and dock, to be located in Westchester County's Glen Island Park in New Rochelle. This project will build on previously funded construction of the boathouse foundation and pilings. Upon completion of these facilities, the PCRA will operate the facility under a long-term lease agreement with the County. \$150,000.

Village of Port Chester: *Village of Port Chester Local Waterfront Revitalization Program Update* - The Village of Port Chester will update its 1992 Local Waterfront Revitalization Program for the Byram River and Long Island Sound waterfronts, to address waterfront development pressure and increased community focus on downtown revitalization. Work will be conducted by a consultant team on behalf of the Village and its Waterfront Advisory Committee. \$32,500.

Village of Tarrytown: *Hudson River Waterfront Parks Redevelopment Project* - The Village of Tarrytown will advance Hudson River waterfront park development adjacent to the Hudson Harbor/Ferry Landings development. The project includes shoreline stabilization, promenade construction, installation of a kayak launch and footbridge, landscaping and amenities at Scenic Hudson RiverWalk Park, and installation of recreational amenities, a retention pond, picnic facilities and refurbishment of the fishing pier at Pierson Park. \$2,370,000.
